2. Besides, Hirai's composition contains a photolytic acid generating compound, which is excluded by present claim 1 language ("consisting of"). Also, in Hirai, after his composition is coated onto a substrate, a heating operation is carried out (see Example), whereas present method of claim 2 excludes a burning step (which is a heating operation according to present specification (pg.5 line 2)). Also, those two references cited in the EPO Communication (which is cited in the IDS dated December 13, 2006) do not teach or suggest present positive photosensitive composition which is coated on a photogravure plated roll nor the present method of coating the positive photosensitive composition on a photogravure plated roll.
